## Experience

### Freelance

2022 June – Present

#### Strong Junior Frontend Developer

After a year of break, I took up programming again and started taking projects and started participating in makers hackathons, where I got good experience with the team again I was Team-Lead Frontend and get the best project and got certificates

### Freelance

2021 June – 2021 Sep(3 month)

#### Junior Frontend developer

I and my friend Python developer took on the Dordoi Online Store project. When we took the project and no one knew how to make a prototype of the site so I had to take it and so I learned how to make prototypes on Figma and gained good experience in web design and Redux and working with the backend

### Atek Digital studio

2021 April – 2021 July – 5 month

#### Junior Frontend developer

Together with the team I developed projects such as Delivery food, CRM System, a Card game for dating, and multi-pages and learned how to develop authorization, diagrams, and lists for the admin panel on MUI, Drag and drop on React, Api, TypeScript

### Atek Digital studio

2020 Dec – 2021 Feb – 3 month

#### Internship Frontend developer

In this outsourcing company, first I was developing landing pages and multi-page sites. I improved the good skills in and JavaScript, React.js, then he began to help the team, where we developed CRM for a client from Germany

### Init.kg

2020 Sept – 2021 Nov – 3 month

#### Student

I studied at the Init.kg school in Kyrgyzstan (Bishkek). Lessons were daily for three hours of classes with practical tasks. I tried very hard, I was persistent, and I helped other students, and I was the best student and successfully graduated from school, and immediately I was offered an internship.
